ZA Zain ul Abdeen

Available for freelance work

Hi, I'm Zain —
I build clean, fast interfaces.

Front-end developer from Lahore, focused on accessible HTML, modern CSS and JavaScript that does exactly what it should — nothing more.

01 About me

I'm Zain ul Abdeen, a front-end developer from Lahore who cares about the small details — the focus ring you can actually see, the layout that never scrolls sideways on a phone, the 200 ms that makes a button feel responsive.

I build with semantic HTML, modern CSS (Grid, Flexbox, custom properties) and vanilla JavaScript, and I'm currently open to junior front-end roles and internships. Outside the browser I'm usually reading about typography or sketching layout ideas on paper.

02 Skills

</>

HTML5

Semantic structure, accessibility, forms.

#

CSS3

Grid, Flexbox, custom properties, responsive design.

JS

JavaScript

DOM, events, fetch, form validation.

G

Git & GitHub

Branching, pull requests, clean commit history.

◐

Responsive UI

Mobile-first layouts that hold up at every width.

Aa

Typography

Type scales, rhythm and readable contrast.

03 Projects

Kohva

Kohva Coffee — Landing Page

A responsive landing page for a fictional coffee roastery. Sticky navigation, CSS-only mobile menu and a consistent design token system.

HTML CSS Responsive

°C

Temperature Converter

An interactive converter for Celsius, Fahrenheit and Kelvin with input validation, absolute-zero warnings and live result cards.

HTML CSS JavaScript

View source on GitHub →

View source on GitHub →

Task Board

A to-do app with pending and completed columns, inline editing, timestamps and localStorage persistence — plain JavaScript, no framework.

JavaScript localStorage UI
